PROFILE SUMMARY

Oracle Fusion Security and Risk Consultant with hands-on experience in AAC, AFC, SoD/SA analysis, role design, and ERP security architecture. Skilled in automating access reviews and control evaluations using Python, Streamlit, SQL, and Polars/Pandas. Delivered solutions across P2P, O2C, and R2R, built high-performance analysis tools, and improved compliance, reconciliation accuracy, and security operations for large-scale Fusion implementations.

RELEVANT SKILLS

- **Oracle Cloud & GRC Tools:** AAC, AFC, Oracle ERP Security, Role Design, OTBI Reports/Dashboard, BIP Report, SOD/SA Analysis.
- **Databases & ETL:** SQL, Alteryx, Snowflake, MySQL
- **Analytics and Reporting:** Power BI, Tableau, Excel (Power Query, DAX)
- **Programming and Automation:** Python, Streamlit, Selenium

EXPERIENCE

EY - Consultant 1

Sept 2023 – Present

- Delivered end-to-end Oracle Fusion ERP Security implementations across 16+ modules spanning FSCM and SCM.
- Designed 50+ custom roles per client requirements, improving provisioning accuracy and reducing role conflicts by 40%.
- Configured Oracle Advanced Access Controls (AAC) for SOD, sensitive access monitoring, and continuous controls
- Implemented Oracle Advanced Financial Controls (AFC) to enable automated transaction monitoring and fraud risk detection.
- Conducted user- and role-level SOD/Sensitive Access (SA) analysis, resolving 200+ conflicts; developed evidencing documentation for false positives and audit-approved exceptions.
- Assessed integration and conversion risks across data movement and interfaces; reviewed Technical and Functional Design Documents (TDD/FDD) to evaluate data flow and middleware dependencies.
- Supported/Coordinated User Acceptance Testing (UAT), contributing to zero critical security defects at go-live.

SECURITY AND AUTOMATION INITIATIVES

SOD & SA Analysis Tool - Oracle | Python | Polars | FastAPI | React | TypeScript

- Built an AAC-style SoD analysis Web App that processes 3M+ records and 100K+ users in seconds, enabling faster conflict identification and reducing manual analysis by multiple hours.
- Automated audit-ready Excel exports with violation grouping, pivot summaries, role/user/control-level breakdowns, and entity-aware sheet splitting for oversized datasets.
- Integrated a 3-level False Positive pipeline as an in-tool toggle that evaluates privilege-level edit access, isolates single-leg violations, and outputs categorised results separating true violations, false positives, and single-leg cases.

Oracle Role Comparator Tool - Oracle | Python | Polars | FastAPI | React | TypeScript

- Automated cross-environment role comparison application using vectorised semi/anti-joins to surface differences in security configurations between Dev and Prod.
- Replaced manual Excel-based comparison, reducing go-live validation effort while improving accuracy and reproducibility.

Ruleset Mapping Tool - Oracle | Python | Polars | FastAPI | React | TypeScript

- Built a 3-step Jaccard-based entitlement matching engine that maps client rulesets to EY's standardised ruleset with confidence scores and alternative coverage insights.
- Replaced multi-day manual Excel analysis with a sub-minute automated pipeline producing client-ready mapping recommendations.
