PROFILE SUMMARY

Results-driven Associate Consultant with 1.8 years of experience in Oracle ERP data migration, business process automation, and dashboard development. Skilled in SQL, Python, Alteryx, and Power BI, with hands-on expertise in ETL workflows, reconciliation logic, and controls validation. Known for effectively bridging technical and business teams to deliver data-driven solutions in ERP environments.

RELEVANT SKILLS

- ETL & Data Migration Tools: Alteryx, SQL, Python, Snowflake
- Data Visualization & Reporting: Power BI, Tableau, DAX, Power Query, Excel, VBA,
- Programming & Automation: Python (Pandas, NumPy), Streamlit, Selenium, Power Automate
- Cloud & Data Platforms: Microsoft Azure, Snowflake, Render, Git
- ERP Systems: Oracle Fusion ERP (Financials, HCM), Enterprise Performance Management (EPM)

EXPERIENCE

EY – Associate consultant 2

Sept 2023 – Present

Project 1: Oracle ERP Data Migration & Control Review

- Reviewed the complete data migration lifecycle for a client transitioning from a legacy ERP system to Oracle Fusion, including data conversion strategy, integration design documentation, reconciliation logic, and validation approach
- Analyzed extract files from both source and target systems using Excel functions like VLOOKUP, XLOOKUP, and conditional logic to verify data consistency and integrity.
- Engaged directly with client-side teams to understand their migration approach, including the tools used, reconciliation methodology, and any deviation from the approved design documents.
- Monitored defect logs in JIRA to ensure all reported issues were addressed; for unresolved items, collaborated with client stakeholders to document the rationale.
- Drafted detailed review observations and recommended best practices to the client, focusing on improvements in reconciliation logic, validation processes, and overall compliance with data migration standards.

Project 2: Power BI Reporting & KPI Dashboarding

- Replaced static Excel reports with an interactive Power BI dashboard to simplify SoD-SA violation tracking for clients.
- Collaborated with managers to identify key KPIs and designed a standardized dashboard that improved clarity and usability.
- Dashboard was adopted across multiple projects and teams; conducted walkthrough sessions to support organization-wide adoption.

Project 3: AI Agent for Document Review (Current Initiative)

- Core contributor to the development and testing of an AI agent for automating document reviews process.
- Collaborated with the development team to validate LLM outputs, and improve accuracy using Python-based validation scripts.
- Provided domain-specific feedback, enabling the team to improve precision of AI model by 20% during pilot testing.

PROJECTS

ENTERPRISE-SCALE SALES DATA ANALYTICS PROJECT (PYTHON | SNOWFLAKE | SQL | POWER BI)

- Engineered a scalable, relational dataset simulating an enterprise-grade sales ecosystem by generating over **1M transactional records** across fact and dimension tables, replicating real-world data complexities.
- Loaded data into **Snowflake** using stages and performed **ETL** operations by writing **20+ optimized SQL queries** for transformation and cleaning.
- Connected to **Power BI**, leveraging **Power Query** for additional transformations, creating calculated columns, **DAX measures**, and **custom KPIs**.
- Built an interactive executive dashboard visualizing KPIs like revenue trends, customer loyalty impact, product category performance, and regional sales patterns, improving decision-making insights for simulated business operations.

EDUCATION

SRM Institute of Science and Technology

Bachelor of Technology in Computer Science – CGPA: 8.95

May 2019 – May 2023

Chennai, Tamil Nadu
