PROFILE SUMMARY

Data Analyst with 2 years of experience at EY, skilled in Power BI, SQL, Python, and Azure. Experienced in building dashboards, statistical models, and financial analyses to optimize workforce planning and business performance. Proven track record of reducing reporting time by 88%, improving data accuracy, and driving 10%+ margin improvements. Known for aligning technical execution with business needs to drive efficiency and enable data-informed decision-making across teams.

RELEVANT SKILLS

- Data analytics and Visualization: Power BI, DAX, Power Query, Tableau, Streamlit, Seaborn, Matplotlib
- Programming & Automation: Python (Pandas, NumPy), SQL, Power Automate, Selenium
- Cloud & Data Platforms: Azure, Snowflake, Render, Git
- Other Tools: Advanced Excel, Alteryx

EXPERIENCE

EY – Analyst 2

Sept 2023 – Present

PROJECT: TALENT POOL – HR ANALYTICS | TOOLS: POWER BI, SQL, PYTHON, AZURE

- Developed **Power BI dashboards** to track employee skillsets, bench time, and upcoming project demand across departments—enabling HR to identify training gaps and improve workforce planning.
- Improved turnaround time by **88% from 24 days to 3 days**, using scheduled refreshes resulting in improved data accuracy (**95%**).
- Carried out skill gap analysis between available talent and forthcoming project needs.
- Implemented strategic upskilling, **reducing supply-demand gaps by 21%**, enhancing workforce alignment and improving project fulfilment

PROJECT: LABOUR ECONOMICS | TOOLS: PYTHON, DATABRICKS, POWER BI

- Analyzed and presented the BAU financial performance of the various service lines to stakeholders.
- Identified **low gross margin** areas and recommended **actionable steps** to increase margins by **10.22%** per employee.
- Analyzed and presented employee attributes (compensation, utilisation) across designations for multiple years.
- Validated the hypothesis for average compensation, %hike and utilisation using T-test.

PROJECT: PROMOTION CALENDAR FOR RETAIL STORE (CP&R) | TOOLS: PYTHON, SKLEARN, POWER BI

- Conducted price band, price point, gap, and elasticity analyses to evaluate promotion effectiveness.
- Built XGBoost forecasting models on historical sales data to predict next year's performance.
- Designed Power BI dashboards combining sales, media, and promotions to uncover trends and optimize ROI.

PROJECTS

ENTERPRISE-SCALE SALES DATA ANALYTICS PROJECT (PYTHON | SNOWFLAKE | SQL | POWER BI)

- Engineered a scalable, relational dataset simulating an enterprise-grade sales ecosystem by generating over **1M transactional records** across fact and dimension tables, replicating real-world data complexities.
- Loaded data into **Snowflake** using stages and performed **ETL** operations by writing **20+ optimized SQL queries** for transformation and cleaning.
- Connected to **Power BI**, leveraging **Power Query** for additional transformations, creating calculated columns, **DAX measures**, and **custom KPIs**.
- Built an interactive executive dashboard visualizing KPIs like revenue trends, customer loyalty impact, product category performance, and regional sales patterns, improving decision-making insights for simulated business operations.
