PROFILE SUMMARY

Data analyst skilled in Python, SQL, and Tableau, with a focus on automating processes (70% efficiency gains) and delivering actionable insights through tools like Power BI and Streamlit. Proven track record in simplifying complex workflows for cross-functional teams.

RELEVANT SKILLS

- | | | | |
|----------|-------------------|--------------|------------|
| • Python | • Advanced Excel | • Statistics | • Alteryx |
| • SQL | • PowerBI/Tableau | • Streamlit | • Selenium |

EXPERIENCE

EY – Analyst 2

Sept 2023 – Present

- Develop a **Python-based automation bot** using Selenium to streamline and automate role testing processes, reducing project completion time from **2+ weeks to a few hours**, resulting in **70% efficiency** improvement.
- Design a Streamlit-based front end for the bot, enabling users to effortlessly enter credentials and the Oracle instance URL through an **intuitive interface**. Simplifying security audits, reducing errors by 40% and cutting manual effort by 70%.
- Automate SOD control analysis by developing a Python tool with **Streamlit** UI, replacing SQL/macro dependencies, enabling **non-technical teams** to run security audits independently and reducing process time **by 60%**.
- Transform complex SOD audit report by building a **user-friendly Power BI dashboard** with dynamic filters and role-specific **KPIs**, reducing business review time **by 40%** and increasing cross-functional **adoption by 3+ teams**.

PROJECTS

IT SKILLS AND SALARY TRENDS IN INDIA (PYTHON | PANDAS | STREAMLIT | MATPLOTLIB | SEABORN)

- Assembled and cleaned a dataset of **36,000+** entries, ensuring **data accuracy and integrity** to support reliable and meaningful analysis.
- Leveraged Python for **data analysis**, extracting patterns and trends, and created visually impactful graphs using **Matplotlib** and **Seaborn** to effectively communicate insights.
- Designed and developed an **interactive web application** with Streamlit, enabling users to explore skill requirements and salary information for informed career decisions.
- Deployed the app on **Render**, making it globally accessible and providing users with seamless access to valuable **career insights**.

ENTERPRISE-SCALE SALES DATA ANALYTICS PROJECT (PYTHON | SNOWFLAKE | SQL | POWER BI)

- Engineered a scalable, relational dataset simulating an enterprise-grade sales ecosystem by generating over **1M transactional records** across fact and dimension tables (FactOrder, dimCustomer, dimProduct, dimStore, etc.), replicating real-world data complexities.
- Loaded data into **Snowflake** using stages and performed ETL (Extract, Transform, Load) operations by writing **20+ optimized SQL queries** for transformations like data cleaning, joins, and aggregations.
- Connected Snowflake to **Power BI**, leveraging **Power Query** for additional transformations, creating calculated columns, DAX measures, and custom KPIs.
- Built an interactive executive dashboard visualizing KPIs like revenue trends, customer loyalty impact, product category performance, and regional sales patterns, improving decision-making insights for simulated business operations.

NEWS RESEARCH BOT (PYTHON | STREAMLIT | NLP | HUGGINGFACE TRANSFORMERS | LANGCHAIN)

- Developed a Streamlit-based news research bot that processes multiple articles in real-time, extracting content and generating embeddings with **FAISS** for efficient document retrieval.
- Integrated **NLP functionality** with the **deepset/roberta-base-squad2 model** to provide context-aware, precise answers to user queries, enhancing user experience with relevant summaries and source tracking.
- Optimized the data processing pipeline using **newspaper3k** for article parsing and **LangChain** for **text chunking**, ensuring scalable, efficient processing and a user-friendly interface for non-technical users.

EDUCATION

SRM Institute of Science and Technology

Bachelor of Technology in Computer Science – CGPA: 8.95

May 2019 – May 2023

Chennai, Tamil Nadu
